1920 CENSUS—INDEX  
DEPARTMENT OF COMMERCE  
BUREAU OF THE CENSUS

U. S. GOVERNMENT PRINTING OFFICE

1917-1918

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters  $\alpha$  and  $\beta$ . It is shown that the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The second part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a step function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The third part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a piecewise linear function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The fourth part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a piecewise constant function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The fifth part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a piecewise linear function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The sixth part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a piecewise constant function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The seventh part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a piecewise linear function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The eighth part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a piecewise constant function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The ninth part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a piecewise linear function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The tenth part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a piecewise constant function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative.

1. The first group of people who are interested in the study of the history of the world are the historians. They are people who study the past and try to understand what happened and why it happened. They use a variety of sources, including books, documents, and artifacts, to reconstruct the past. They also try to understand the people who lived in the past and how they thought and felt. Historians are interested in the past for a variety of reasons. Some are interested in the past because they want to know what happened and why it happened. Others are interested in the past because they want to understand the people who lived in the past and how they thought and felt. Still others are interested in the past because they want to learn from the mistakes of the past and avoid them in the future.
